Abstract:

The purpose of this paper is to focus an analysis of the literature and explain new vision on skill development in relation with higher education. The literature discloses about the value of skill development and role of higher education in present scenario. The study also focuses on how important it is for the government and other stake holders to work together mutually so as to produce skilled workforce to bridge the skill gap and boost up the economic development. The paper coverage attempts to reveal the quality of higher education including skill development transformation functions in India. The Skill India movement has several benefits, its directly impact on unemployment in the country by creating a more skilled and productive workforce. The paper in hand discusses also theoretical foundations of higher education for implementing skill development to entrepreneurs.

Keywords: Higher Education, Skill Development India, Workforce readiness, Entrepreneurship.

Introduction:

India enjoys a rich demographic dividend with one of the largest working populations (880 million). There are numerous reports that project India's GDP to grow from the current \$3.5 trillion to \$30 trillion by 2047. But for India's march towards becoming the third largest economy, the existing skill-gap in the country needs to be bridged and
