

Action Taken Report on Energy Usage - 2022-23

Date: 15-12-2022

This report outlines the actions taken to optimize energy usage within the institution, in line with our commitment to sustainability and reducing our carbon footprint. The measures were implemented in response to the findings of the recent energy audit and are aimed at enhancing energy efficiency across the campus.

Objectives

- ✓ To reduce overall energy consumption
- ✓ To increase the use of renewable energy sources.
- ✓ To promote awareness and educate students and staff about energy-saving practices.

Actions Taken

1. Replaced traditional lighting with LED bulbs in classrooms, offices, and common areas, reducing energy consumption
2. Installed energy-efficient heating, ventilation, and air conditioning systems to optimize energy use in buildings.
3. Conducted workshops and training sessions for students and staff on energy conservation practices, such as switching off lights and appliances when not in use.
4. Implemented motion sensors and automatic shut-off systems in low-traffic areas to reduce unnecessary energy usage.
5. Conducted quarterly energy audits to assess the impact of implemented measures.

Action Taken Report on Energy Usage 2021-22

Date: 17-12-2021

This report outlines the actions taken to optimize energy usage within the institution, in line with our commitment to sustainability and reducing our carbon footprint. The measures were implemented in response to the findings of the recent energy audit and are aimed at enhancing energy efficiency across the campus.

Objectives

- To reduce overall energy consumption
- To increase the use of renewable energy sources.
- To promote awareness and educate students and staff about energy-saving practices.

Actions Taken

1. Conducted quarterly energy audits to assess the impact of implemented measures.
2. Replaced traditional lighting with LED bulbs in classrooms, offices, and common areas, for reducing energy consumption
3. Conducted awareness sessions for students and staff on energy conservation practices,

Action Taken Report on Energy Usage 2020-21

Date: 21-12-2020

This report outlines the actions taken to optimize energy usage within the institution, in line with our commitment to sustainability and reducing our carbon footprint. The measures were implemented in response to the findings of the recent energy audit and are aimed at enhancing energy efficiency across the campus.

Objectives

- To reduce overall energy consumption
- To increase the use of renewable energy sources.
- To promote awareness and educate students and staff about energy-saving practices.

Actions Taken

1. Installed energy-efficient air conditioning systems to optimize energy use in buildings.
2. Created an information display at various places making all stakeholders aware about
3. Conducted sessions for students and staff for creating awareness on energy conservation practices.
4. Conducted quarterly energy audits to assess the impact of implemented measures.
